Globally ,very few innovations have had the impact of transforming healthcare as much as the adaptation of patient classification systems for healthcare service delivery.

Implemenation of Casemix analysis is central to managers, researchers, clinicians, quality analysts, informatics and Insurance providers in Healthcare.

Improving Efficiency and value in Indian healthcare

"If today, you have improved outcomes without escalating cost, you have succeeded.
If today, you have delivered equally good outcomes more efficiently, you have succeeded.
If today, you didn't do one of those two things, you have failed."
- Michael Porter
